2011

# THE APPLGRAM

*Apple Corps of Dallas*

STARTING AT 9:00 AM TO  
12:00 NOON

## Saturday Events

9:00 - 10:00

### Web Design Sig

- Web Design SIG focuses on iWeb '09 and other social networking tools.
- iPhone / iOS 4 SIG focuses on some of the new features on iPhone 4.
- Final Cut SIG meeting talks about Final Cut.

10:00 - 11:00

### Main Meeting

Besides topic speaker any club business may be conducted here.

11:00 - 12:00

### Photography SIG Lead by: Walt Smith

- Our Photography SIG is a great place to go when you want to learn more about using your Mac with your photos.
- FileMaker Sig helps you with with programs like Bento & Filemaker for personal and business use.
- Mac Help Desk Sig is **THE** place to get help from club members who just might put the Apple Certified Geniuses to shame

*For the first time in the USA you have a choice on iPhone carrier with out having to jailbreak your phone.*

### On 1-11-11 at 11 AM an announcement was made

Ok, so It's highly hyped, that doesn't really mean it's not exciting. I have not been thrilled about "Call Dropping" on ATT or their billing/rate plans. But beyond that I have mostly been satisfied with AT&T. I have never had Verizon as a carrier. In fact I was slow to adopt a cell phone and even slower to get an iPhone. I didn't join the iPhone craze until the 3G model was already very long in the tooth. Since then I have moved on to the 4G. I am pleased wth myself for skipping over the 3GS. Not that't the 3Gs had any issue. I still see myself benefiting greatly from Verizon's entry into the market. There will be a few who flee ATT and run into the arms of Verizon. Good, more bandwidth for us! Not to

mention it might wake ATT up the fact they need to treat us better. There are already rumors of better 'TXT' plans running and I suspect better Data and Tethering or "hot spot" terms may be announced as well. So in my humble opinion, this is a change we can all learn to love and live with. Perhaps even tMobile and Sprint will join into the iPhone club eventually.

# Mac OS X 10.6.6 makes Boot Camp Changes

**B**oot Camp now ask only for an Original Windows 7 Disk when creating a new partition. No mention of Windows XP or Vista are made at all. It would seem that Apple is dropping future support for those later versions.

**Boot Camp** now requires you to download specific drivers for your machine and you are now advised not to rely on the original OS X install disk. Likely Apple is trying to be proactive and reduce the number of phone calls it receives to support these older versions of Windows and match the driver provided more closely to the actual machine windows is being installed on.

It is rumored that the option to install XP or Vista still exist if the machine you are using is of a 2009 or older vintage.

Vista or Windows XP are no longer listed as options

## Apple hires NSA, Navy Expert (David Rice) to Head Security Department

As is typical for Apple they are tight lipped about Mr. Rice's exact job description but from his past experience we can infer that hiring Mr. Rice furthers Apple's plans in both enterprise level marketing/

support and also in it's own internal day to day operations. Rice should begin his full duties some time in March.

Intel and NVIDIA today settled their longstanding chipset dispute in a deal that heavily favored NVIDIA. The truce will see Intel pay NVIDIA \$1.5 billion to license all of the patents for NVIDIA's graphics cores. NVIDIA will keep use of Intel's patents, outside of proprietary x86

## Apple has release a firmware update for Time Capsule

The firmware update addresses security issues that deal the ability to maintain stability even in the face of some known remote attacks. Including an overflow error in SNMP and DDOS attacks.

Some other changes fixes password issues with the systems keychain utility.

# Find Any File By Thomas Tempelmann

Open Mac App Store to buy and download apps.

## Description

Find every file on any of your disks, including those usually hidden. Fast and precisely.

- Ever lost a file whose name you partially remember, now hidden somewhere on your disk?
- Need to see what files got changed in the past 2 minutes?

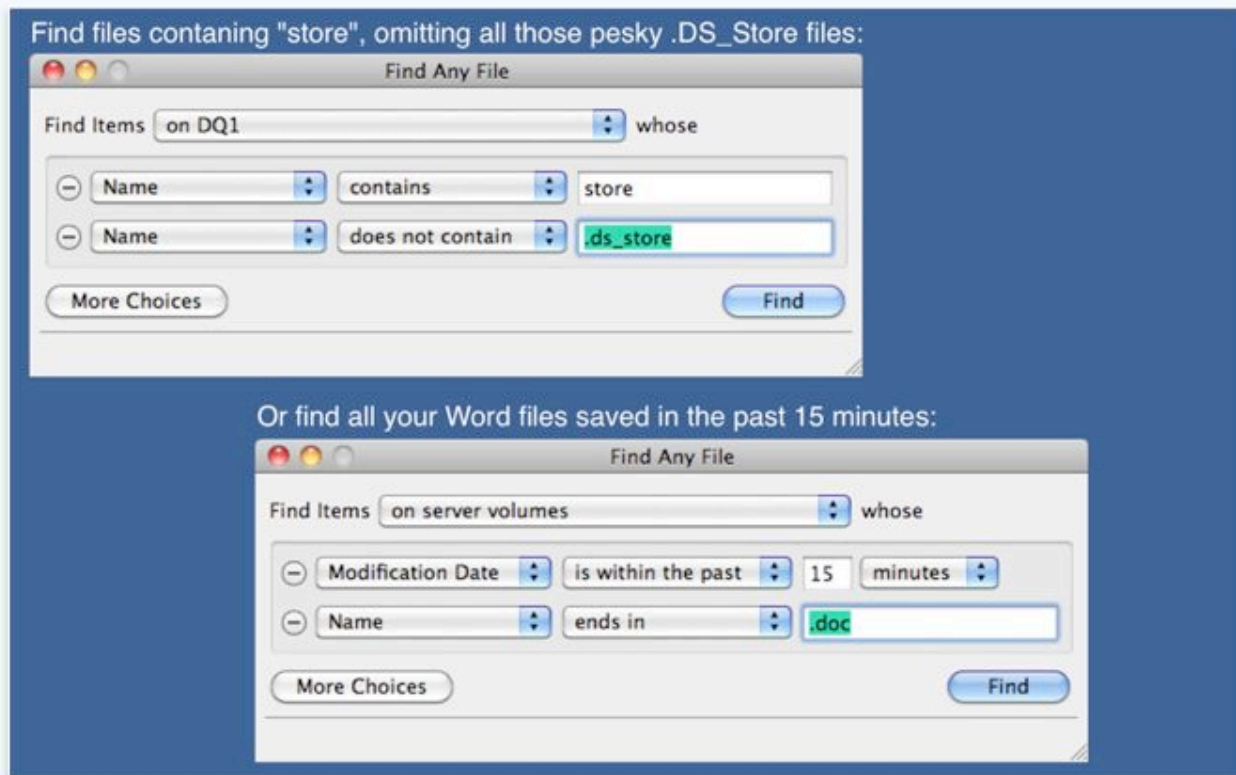

Find Any File (FAF) is the perfect tool for these tasks.

You can even search on disks that are not indexed by Spotlight, including server volumes.

Find Any File can find files that Spotlight doesn't, e.g. those inside bundles and packages, and inside system folders that are usually excluded from Spotlight search.

“FAF goes where Spotlight's can't easily reach. Not only that, the search results are nicely listed just as in Finder's hierarchical (flipping triangles) folder view or as a single list as in Finder with sortable columns for name, size, kind, and modification date.”

## Screenshots

# MAC OS App Store changes the tilt of the play field.

While it will probably always be possible to download your new application directly from the vendors site in one form or another Apples entry into the App Store for the OS itself changes things in many ways.

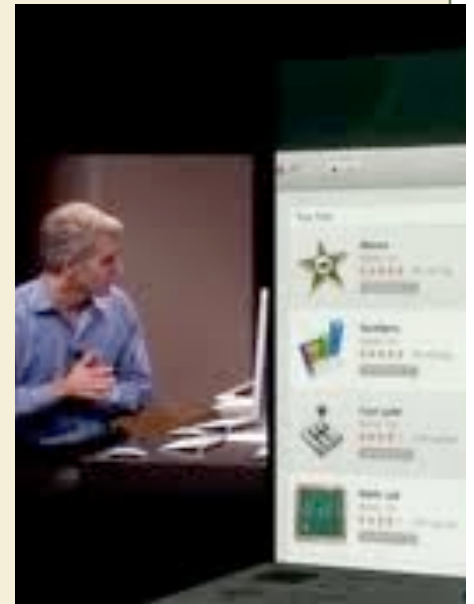

**Every** time you enter the store you will get messages about the apps you already have and be given the opportunity to update them all at once.

**Apple** gets yet another revenue stream as they get a 30% cut of the sales from the store. You will need to update to 10.6.6 to take advantage of the store. If you are still running Leopard 10.5 or earlier and you really

want to check out the Apple App store your only choice is to upgrade.

Software such as iWork and iLife can be bought by the individual application instead of as the whole bundle. So far Apple's enterprise level applications such as Final Cut or File Maker are not on the store, but if Apple expects other large name companies to make their software available in the App Store then that to will likely change soon. Like it's cousin the iTunes App Store of IOS devices there are many low cost or even free applications available. But there are a few high end applications available even now.

If you have seen the App Store on the iPad, you know how the App Store for OSX works too.

**A fall in Apple's stock price triggered by Steve Job's poor health is probably a opportunity for investors to buy low and sell high**

## STEVE CALLED IN SICK

Even though Steve has let it be known that for health reasons he wont be in the office much he still we be highly involved with new developments at Apple. Steve has not stepped down from the other companies that he is a part of. It is predicted that even with Steve mostly on the sidelines that Apple Stock will likely hit well over \$500.00 a share this year.

Estimated sales of Macintosh Computers and iPads are expected to continue to ramp up higher and higher levels. Were Steve not to return to fully active status it is somewhat likely that he would be replaced with Scott Forstall the current VP of the iPhone software Division.

Currently Tim Cook will be responsible for Apple's Day to Day Operations. Jobs has had recurring medical problems since 2004, when he was treated for pancreatic cancer.

# 8mm Vintage Camera

By Nexvio Inc.

## Description

Shoot old-fashioned 8mm movies in real time.

"The Top 10 Best Photography Apps for iPhone in 2010"  
- The iPhone Guru

**Requirements:** Compatible with iPhone 3GS, iPhone 4, and iPod touch (4th generation). Requires iOS 4.1 or later.

\$1.99

[Nexvio Inc. Web Site](#) [8mm Vintage Camera Support](#)

- Swap lenses and films at any time
- Trigger frame jitter during recording
- Turn on/off flash on supported devices
- Switch between front and back cameras on supported devices
- Tap to focus and adjust exposure

Apple Corps of Dallas  
Board of Directors Meeting  
Held Before the Membership  
(Not a Quarterly Membership Meeting)  
December 11, 2010  
Official Minutes

Location: Richardson Civic Center, 411 West Arapaho Road, Richardson, Texas  
75080

Meeting called to Order at 10:15am by John Jones

Attendees:

President: John Jones (2010) (2011)

Vice President: Allen Yoder (2010) (2011)

Board Members (2 year terms):

Class of 2011-2012

Barbara Hartger

Linda Reis

Maggie Reddy

Class of 2010-2011

Lawrence Jenkins (absent)

Julie Ramseur

Dru Richman

Class of 2009-2010

Bob Dain

Simon Lewenstein

Carl Stewart (absent)

Appointed Positions:

Treasurer – Taylor Sharpe

Membership Director – David Harned

AppleGram Editor – Allen Yoder

Program Director – Maggie Reddy

Webmaster – John Jones

Secretary – Taylor Sharpe

Apple Ambassador – Walt Smith

iPhone/iPad SIG Leader - Taylor Sharpe

Mac Help Desk SIG Leader - Dru Richman

Final Cut Pro SIG Leader - Ed Waldrup (absent)

Graphics & Photography SIG Leader - Walt Smith

FileMaker Database SIG Leader - Taylor Sharpe

Historian - Ray Thompson

# 10 Billionth app has been downloaded from Apple's App Store.

**T**he woman who received the telephone call from Apple actually hung up on them as she was certain it was just another telemarketer trying to market some other clever scam.

**Gail Davis** a woman from England had not in fact downloaded any new apps. But as it turned out her children had and with out asking permission first.

**Paper Glider** was the free application that had been downloaded by her children. Lucky for Mrs. Davis Apple did try to call her back and this time she took the call seriously.

The top paid iPhone Apps are

1. Doodle Jumo
2. Angry Birds
3. Traffic Rush
4. Flight Control
5. Tap Tap Revenge-3
6. Tap Tap Revenge 2.6
7. Tap Tap Revenge Classic
8. Pocket God
9. Bejewled 2
10. App Box Pro Alarm

Davis was distraught when she called Apple back and somehow the person on the company's helpdesk reportedly proved to be less than helpful. Perhaps Davis was already a marked woman. Perhaps it had been Apple COO Tim Cook himself calling to tell her she had won a \$10,000 gift card.

**Sell your old Mac to help pay for the new one, or at least pay for some new apps.**

Allen Yoder  
Applegram Editor

## APPLE COMPUTER REUSE AND RECYCLING

### Online resellers

1. Gazelle.com
2. SellYourMac.com
3. NextWorth
4. PowerOn.com
5. Gainsaver.com
6. iPhonesintocash.com

I have dealt with Gazelle, Gainsver, and iPhonesintocash and would recommend them all again to you.

# Freezing LCD's – How Cold Temps Can Lead to a Damaged Mac

by [Timothy Chan](#)

Sometimes when given information, some information may only have partial truths even though they may logically make sense until more data is acquired. Such is what I've known about Liquid Crystal Displays (LCD). Previously, I believed that LCDs would freeze and cause damage to electronic components. Recently after some research, I've found out the why this can be true – although my logic as to why was flawed. [The liquid in LCD is not liquid but actually a paste](#). As such it will not freeze if the temperature the LCD is exposed to is at the freezing point of water. However, [cold temperatures can potentially lead to causing damage to electronics due to condensation that builds up inside the laptop which can cause to shorting out circuitry](#) inside the computer.

[According to discussions on Apple.com](#) we find that Apple's recommendations are:

Operating temperature: 50° to 95° F (10° to 35° C)

Storage temperature: -13° to 113° F (-24° to 45° C)

You can store your MacBook in an environment with a lower temperature, but just be sure to warm it up to the recommended operating temperature before using the device as an immediate turn on could lead to those nasty condensation problems that could fry out your comp.

Technorati Tags: [LCDs](#), [tjchan](#), [Apple Corps of Dallas](#), [AUG](#)

Editors Note:

If you are forced to store your equipment outside of its operational safe range for any extended amount of time, let the unit adjust to room temperature for no less than 6 hours and up to 24 hours before applying power. The device you save may be your own. Avoid extreme temperature shocks.

# 21 Habits of Happy People

*"Happiness is a habit – cultivate it." ~ Elbert Hubbard*

Happiness is one aspiration all people share. No one wants to be sad and depressed.

We've all seen people who are always happy – even amidst agonizing life trials. I'm not saying happy people don't feel grief, sorrow or sadness; they just don't let it overtake their life. The following are 21 things happy people make a habit of doing:

## **1. Appreciate Life**

Be thankful that you woke up alive each morning. Develop a childlike sense of wonder towards life. Focus on the beauty of every living thing. Make the most of each day. Don't take anything for granted. Don't sweat the small stuff.

## **2. Choose Friends Wisely**

Surround yourself with happy, positive people who share your values and goals. Friends that have the same ethics as you will encourage you to achieve your dreams. They help you to feel good about yourself. They are there to lend a helping hand when needed.

## **3. Be Considerate**

Accept others for who they are as well as where they are in life. Respect them for who they are. Touch them with a kind and generous spirit. Help when you are able, without trying to change the other person. Try to brighten the day of everyone you come into contact with.

## **4. Learn Continuously**

Keep up to date with the latest news regarding your career and hobbies. Try new and daring things that has sparked your interest – such as dancing, skiing, surfing or sky-diving.

## **5. Creative Problem Solving**

Don't wallow in self-pity. As soon as you face a challenge get busy finding a solution. Don't let the set backs affect your mood, instead see each new obstacle you face as an opportunity to make a positive change. Learn to trust your gut instincts – it's almost always right.

## **6. Do What They Love**

Some statistics show that 80% of people dislike their jobs! No wonder there's so many unhappy people running around. We spend a great deal of our life working. Choose a career that you enjoy – the extra money of a job you detest isn't worth it. Make time to enjoy your hobbies and pursue special interests.

## **7. Enjoy Life**

Take the time to see the beauty around you. There's more to life than work. Take time to smell the roses, watch a sunset or sunrise with a loved one, take a walk along the seashore, hike in the woods etc. Learn to live in the present moment and cherish it. Don't live in the past or the future.

# 21 Habits of Happy People

*"Happiness is a habit – cultivate it."* ~ Elbert Hubbard

## 8. Laugh

Don't take yourself – or life too seriously. You can find humor in just about any situation. Laugh at yourself – no one's perfect. When appropriate laugh and make light of the circumstances. (Naturally there are times that you should be serious as it would be improper to laugh.)

## 9. Forgive

Holding a grudge will hurt no one but you. Forgive others for your own peace of mind. When you make a mistake – own up to it – learn from it – and FORGIVE yourself.

## 10. Gratitude

Develop an attitude of gratitude. Count your blessings; All of them – even the things that seem trivial. Be grateful for your home, your work and most importantly your family and friends. Take the time to tell them that you are happy they are in your life.

## 11. Invest in Relationships

Always make sure your loved ones know you love them even in times of conflict. Nurture and grow your relationships with your family and friends by making the time to spend with them. Don't break your promises to them. Be supportive.

## 12. Keep Their Word

Honesty is the best policy. Every action and decision you make should be based on honesty. Be honest with yourself and with your loved ones.

## 13. Meditate

[Meditation](#) gives your very active brain a rest. When it's rested you will have more energy and function at a higher level. Types of meditation include yoga, hypnosis, relaxation tapes, affirmations, visualization or just sitting in complete silence. Find something you enjoy and make the time to practice daily.

## 14. Mind Their Own Business

Concentrate on creating your life the way you want it. Take care of you and your family. Don't get overly concerned with what other people are doing or saying. Don't get caught up with gossip or name calling. Don't judge. Everyone has a right to live their own life the way they want to – including you.

## 15. Optimism

See the glass as half full. Find the positive side of any given situation. It's there – even though it may be hard to find. Know that everything happens for a reason, even though you may never know what the reason is. Steer clear of negative thoughts. If a negative thought creeps in – replace it with a positive thought.

# 21 Habits of Happy People

*"Happiness is a habit – cultivate it." ~ Elbert Hubbard*

## **16. Love Unconditionally**

Accept others for who they are. You don't put limitations on your love. Even though you may not always like the actions of your loved ones – you continue to love them.

## **17. Persistence**

Never give up. Face each new challenge with the attitude that it will bring you one step closer to your goal. You will never fail, as long as you never give up. Focus on what you want, learn the required skills, make a plan to succeed and take action. We are always happiest while pursuing something of value to us.

## **18. Be Proactive**

Accept what can not be changed. Happy people don't waste energy on circumstances beyond their control. Accept your limitations as a human being. Determine how you can take control by creating the outcome you desire – rather than waiting to respond.

## **19. Self Care**

Take care of your mind, body and health. Get regular medical check ups. Eat healthy and work out. Get plenty of rest. Drink lots of water. Exercise your mind by continually energizing it with interesting and exciting challenges.

## **20. Self Confidence**

Don't try to be someone that you're not. After all no one likes a phony. Determine who you are in the inside – your own personal likes and dislikes. Be confident in who you are. Do the best you can and don't second guess yourself.

## **21. Take Responsibility**

Happy people know and understand that they are 100% responsible for their life. They take responsibility for their moods, attitude, thoughts, feelings, actions and words. They are the first to admit when they've made a mistake.

Begin today by taking responsibility for your happiness. Work on developing these habits as you own. The more you incorporate the above habits into your daily lifestyle – the happier you will be.

Most of all: BE TRUE TO YOURSELF

## We're looking for the most original use of an Apple since Adam.

What in the name of Adam do people do with Apple Computers?

You tell us.

In a thousand words or less.

If your story is original and intriguing enough, you could win a one-week all-expense paid trip for two to Hawaii. Which is the closest we could come to paradise.

### Win fabulous prizes for creative writing.

To enter, drop by your nearest Apple dealer and pick up an entry blank. Fill it out. Then write an article, in 1000 words or less, describing the unusual or interesting use you've found for your Apple.

A jury of independent judges will cast the deciding vote for the grand prize: a week for two, airfare included, in Hawaii.

The judges will also choose 16 additional winners, two each from eight categories:

graphics/music, entertainment, home, business, education, scientific, professional, and industrial. And each winner will choose from a long list of longed-after Apple peripherals—from Apple Disk II's to Graphics Tablets to printers. Or you can take a \$250 credit towards the purchase of any Apple product.

The contest ends March 31, 1980. All winners will be notified by May 15.

Entry forms are available at your participating Apple dealer. Call 800-538-9696, (800-662-9238 in California), for the one nearest you.

Mail the entry blank, your article and any photos to: Apple Computer, "What in the name of Adam" contest, 10260 Bandley Drive, Cupertino, CA 95014.

And may the juiciest application win.

apple computer

## T-Shirts

Be the Apple of everyone's eyes in these comfortable, eye-catching T-shirts. Classic men's, women's (French cut), and children's styles all boldly display the Apple logo. Specify size and color on order form.

### A Women's

50/50 polyester/cotton French-cut V-neck. Small (4-6), Medium (8-10), Large (12-14). Light blue or tan.  
Order no. C-002 ..... \$9.50 (\$2.72)

### B Child's

50/50 polyester/cotton. Small (4-6), Medium (8-10), Large (10-14). Light blue or tan.  
Order no. C-003 ..... \$8.00 (\$2.72)

### C Men's

100% cotton Hanes Beety T. Small (34-36), Medium (38-40), Large (42-44), X-Large (46-48). Light blue or tan.  
Order no. C-001 ..... \$8.50 (\$2.72)

## Introducing Apple II.™

## Introducing Macintosh. What makes it tick. And talk.

Well, to begin with, 110 volts of alternating current.  
Secondly, some of the hottest hardware to come down the pike in the last 3 years.  
*The garden variety 16-bit 8088 microprocessor.*

*Macintosh's 32-bit MC68000 microprocessor.*

Some hard facts may be in order at this point:  
Macintosh's brain is the same blindingly-fast 32-bit microprocessor we gave our other brainchild, the Lisa™ Personal Computer. Far more powerful than the 16-bit 8088 found in current generation computers.

Its heart is the same Lisa Technology of windows, pull-down menus, mouse commands and icons. All of which make that 32-bit power far more useful by making the Macintosh™ Personal Computer far easier to use than current generation computers. In fact, if you can point without hurting yourself, you can use it.

Now for some small talk.  
Thanks to its size, if you can't bring the problem to a Macintosh, you can always

bring a Macintosh to the problem. (It weighs 9 pounds less than the most popular "portable".)

Another miracle of miniaturization is Macintosh's built-in 3½" drive. Its disks store 400K—more than conventional 5¼" floppies. So while they're big enough to hold a desk full of work, they're small enough to fit in a shirt pocket. And, they're totally encased in a rigid plastic so they're totally protected.

And talk about programming. There are already plenty of programs to keep a Macintosh busy. Like MacPaint.™

a program that, for the first time, lets a personal computer produce virtually any image the human hand can create. There's more software on the way from developers like Microsoft,™ Lotus,™ and Software Publishing Corp., to mention a few.

And with Macintosh BASIC, Macintosh Pascal and our Macintosh Toolbox for writing your own mouse-driven programs, you, too, could make big bucks in your spare time.

You can even program Macintosh to talk in other languages, like Yiddish or Serbo-Croatian, because it has a built-in polyphonic sound generator capable of producing high quality speech or music.

*The Mouse itself replaces typed-in computer commands with a form of communication you already understand — pointing.*

*Some mice have two buttons. Macintosh has one. So it's extremely difficult to push the wrong button.*

*The inside story — a rotating ball and optical sensors translate movements of the mouse to Macintosh's screen pointer with pin-point accuracy.*

Should you wish to double Macintosh's storage with an external disk

*Macintosh automatically makes room for your illustrations in the text. MacPaint produces virtually any image the human hand can create. Microsoft's Multiplan for Macintosh.*

# Upcoming Meetings

**February 12th** Band in a Box

**March 12th** Rapidweaver 101

**April 9th** Google Docs with Timothy Chan

If you submitted an article or idea for the Applegram and did not see it in this edition it should arrive next month

## APPLE CORPS DALLAS

901 Brookside Drive  
Garland TX. 75042
